

Achieving an excellent education is about many things: becoming a well-educated citizen, gaining knowledge for thoughtful and well-considered decisions, engaging your curiosity, and developing skills that will contribute to the greater good, for example. In addition, your education also prepares you to pursue a **wide variety of career paths**.

Depth of knowledge generally refers to the information and ways of thinking that are directly related to your academic major. In addition, you have developed an **incredibly important set of more general skills**: to think analytically and critically; to view issues in context and from multiple perspectives; to ask and address questions about ethical and societal implications; to pursue research; to engage your creativity; and to communicate complex issues clearly. Thus, **Germanics majors** offer an array of skills which are **highly valued by employers** from all sectors.

Many Possibilities. Because your major is not narrowly focused on specific career paths, you have a wide array of professional options. While this kind of career flexibility is definitely good news, it does require you to be more **proactive** in identifying and articulating your skills to potential employers.

Ready for the Work World. The top five critical skills identified by employers in a recent national survey were:

- Ability to communicate clearly
- Interpersonal / Teamwork skills
- Problem-solving and decision-making abilities
- Ability to find and process information
- Ability to plan, organize, and prioritize

You have undoubtedly developed these skills while studying at UW.
